KEF MOTOR

Geared drill press

 # 2125000

FLOTT drilling machines w/ variable speed - FLOTT TB 13 Plus

MENU FEATURES · Clear and understandable input menu · Mode selection between drilling and tapping · Two precise display values for target- and actual drilling depht as well as the speed · Counting function of drilling/threading strokes · Intelligent memory function of the set parameters · Automatic power saving mode.

THE CONTROL PANEL WITH DISPLAY · Clearly laid out operating panel with a central metal rotary knob · OLEO - Display (organic light-emitting diode) · Dust protected housing of the machine control · Easy disassembly of the control unit for maintenance (only 4 screws) · Just one cable duct to the frequency

converter and depht sensor.

EFFICIENT INTEGRATED LED LIGHTING SYSTEM The positions of the two power LEDs at the front of the machine ensure optimum illumination of the drilling area and the work piece. The work piece creates no interfering shadows in the field of view of the machine user. Also any kind of visual clarity for the machine operator is enhanced by the ar - rangement and the integrated lens system of the LEDs.

INTELLIGENT DRILLING AND TAPPING FUNCTION Reliable adjusting of the thread cutting depth needed by digitally controlled depth display

Product Specification

Rpm	0-4000
Voltage	1x230V-50 Hz
Working table (mm)	40-4000
Drilling Capacity (ø mm)	15
Tapping Capacity	M8
Morse Taper	B16/MK2
Column Diameter (ø mm)	70
Length (mm)	400
Width (mm)	520
Height (mm)	850
