Drill Bit Grinders - 2-13mm

The Scantool Group drill grinding machine is a compact and efficient solution for precision sharpening of twist drills from Ø2-13mm. The machine is ideal for workshops and professionals looking to extend the service life of their drills and maintain sharp cutting edges.

The adjustable grinding angle from 90-135° allows the sharpening process to be adapted to different drilling applications. 11 collets are included to securely hold drills of different sizes during sharpening, while a speed of 5,300rpm ensures an efficient grinding process.

Product Specification

Capacity (mm)	2-13mm
Grinding angles	90-135
Motor (Watt)	180W

Rpm	4800
Voltage	230V/50Hz
Weight	9,5kg
Width (mm)	280mm
Height (mm)	140mm
