Drill Bit Grinders - 13-26mm

The Scantool Group drill grinding machine is a compact and efficient solution for precision sharpening of twist drills from Ø13-26 mm.

The machine is ideal for workshops and professionals looking to extend the service life of their drills and maintain sharp cutting edges.

The adjustable grinding angle from 90-135° allows the sharpening process to be adapted to different drilling applications.

14 collets are included to securely hold drills of different sizes during sharpening, while a speed of 4,800 rpm ensures an efficient grinding process.

Product Specification

Capacity (mm)	2-13mm
Rpm	4800

Grinding angles	90-135
Motor (Watt)	250W
Reversible	No
Voltage	230V/50Hz
Weight	27kg
Width (mm)	435mm
Height (mm)	240mm
